

## EVIDENCE OF GOD'S POWER

The Star Eta Carinae is supposed to be 100 times heftier than our sun, making it one of the most massive stars in our galaxy. It is only 10,000 light years away.

“We can’t even imagine the greatness of (God’s) power” – Jobe 37:5 (NLT). Where does power originate from. Even the big bang theory is dependent on an original force that created the movement and expanse of the universe. There are two problems to solve: the origin of matter and the life force that distributed it and formed it. The universe expanded from its original “bang.” And according to the second law of thermodynamics it is losing its energy and moving from order to disorder. Without God, we’re left with our best guess, which is what we get from science. To believe in God requires faith (Hebrews 11:1). So does believing that our vast universe came into existence by itself. The kind of faith required to believe in a Creator (Hebrews 11:6) comes from believing His Word. What we believe concerning the origin of the universe is dependent on whose word we decide to believe – God’s or man’s. The power to create revealed in the power of God’s Word. The most important words for understanding the origins of the universe are, “Then God said...” (Genesis 1:3). God spoke, and the universe happened.
