

## THE LIGHT OF FAITH

“Then God said, ‘Let there be lights in the firmament of the heavens to divide the day from the night...let them be lights in the firmament of the heavens to give light on earth...’ (Genesis 1:14-15). The sun and the moon were created by God to light the earth night and day. The lights of heaven reveal God’s care for humans on earth. These lights bear witness to the inherent truth within in every person of a Creator (Romans 1:19). The sun and the moon are not only lights, they are signs of Divine Intelligence. Sagittarius, for instance, contains a raging sea of hydrogen gas, oxygen and sulfur. It is 5,500 light-years away. It is about three light-years across. God put it there so when man decided to look into outer space to understand the vast universe, he would discover that God was there first.
