

## WHAT IS MAN (PART II)

Natural selection is the Darwinian substitute for the Designer. It is the high god of evolutionists. It is the substitute for intelligence. Concerning natural selection Geoffrey Simmons M. D. stated that natural selection is a “blind process, and when coupled with another blind process (incidental change), is supposed to produce designs that exceed the capacities of any designers in our experience.” Where is the evidence for natural selection. Where are the transitional forms that provide proof for Darwin’s theory? Where is the evidence for incidental changes required for macro evolution to occur? It simply doesn’t exist. So, why does natural selection continue to be so popular? Because it does away for the need of God. Julian Huxley was honest and bold about this. During the Darwin centennial celebration in Chicago (November 26, 1959), he said, “In the evolutionary pattern of thought, there is no longer need or room for the supernatural. The earth was not created; it evolved.” Huxley opted for a complex philosophical system that could be explained without a supernatural cause. Are we supposed to be impressed? As an evolutionary philosopher, Huxley was a blind man in a dark closet looking for a black cat that isn’t there. “It is better to trust in the Lord than to put confidence in man” (Psalm 118:8).
